RGR
REALLY GREAT READING

INDIANA · GRADES 4–8

RGR Nova™ for Intervention

Know sooner. Act sooner. Change the outcome.

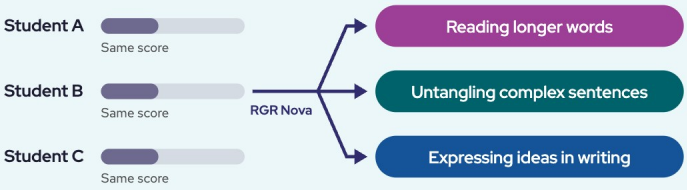
Find what's holding each older reader back. Teach exactly that.

RGR Nova™, the Literacy Outcomes System (LitOS™), pinpoints the specific skills getting in each student's way, groups students automatically, and recommends age-respectful lessons in reading, language, and writing that teachers lead. It's built on the science of reading and supports Indiana DOE's literacy priorities.

Same score. Different needs.

By fourth grade, students must read to learn in every subject. In Indiana, fewer than half of students in grades 3–8 met ILEARN ELA proficiency in 2026.*

Most school corporations know who these students are. The harder question is why they're struggling, and what to teach next.



From diagnosis to targeted teaching

RGR Nova finds the skill in the way, groups students who share it, and gives teachers the lesson that teaches it. It starts with a 30-minute adaptive diagnostic.

Connecting classroom progress with leadership insight

Lessons that respect where students are

Older readers know when material was written for younger kids. RGR Nova lessons use age-respectful texts connected to grade-level content. Every lesson fits your block:

- **20 minutes:** one focused lesson
- **40 minutes:** two lessons, one strand or two
- **60 minutes:** up to three lessons

Support for every educator

Intervention might be led by a reading specialist, a history teacher, or a paraprofessional. Professional learning is built in, so every educator can teach it with confidence.

- **In every lesson:** prompts and short videos
- **On demand:** PD Library modules and courses
- **Live:** sessions, workshops, and coaching

See progress across schools, any time during the year

- **See** which skills and student groups are progressing
- **Support** teachers where they need it
- **Improve** implementation while there's still time
- **Track** growth with Lexile® measures from MetaMetrics®

Outcomes based contracts available for qualifying school corporations, tying a portion of fees to independently verified Lexile® growth.
