

Equipping Educators to Deliver Mature, Impactful Literacy Intervention for Middle and High School Students

Workshop Overview

This full-day workshop equips educators with practical, research-based strategies to strengthen the literacy skills of students in grade 6-12. Participants will gain tools to improve decoding, vocabulary, and comprehension skills using methods that are engaging, age-appropriate, and effective.

You'll leave with the confidence to create meaningful learning experiences that help students reach their full potential.

What You'll Experience

The Science of Reading: Discover the brain-based processes behind reading instruction to make informed, evidence-based teaching decisions.

Interactive Learning: Practice using tools like the Teacher Presentation Tool and explore multi-sensory activities for hands-on application.

Building Expertise: Deepen your skills in decoding, phonemic awareness, and orthographic mapping.

Adolescent Strategies: Learn high-impact methods tailored to older students' developmental needs.

Teaching Complex Skills: Master syllable types, advanced phonics, and multisyllabic decoding techniques.

Vocabulary Development: Boost fluency and comprehension through strategic knowledge-building techniques.

Engaging Texts for Practice:

Use relevant, structured routines with decodable texts designed for middle and high school readers.

Flexible Lesson Planning: Adapt lessons, integrate assessments, and align resources to meet diverse needs.

Data-Driven Insights: Leverage diagnostic tools to track progress and provide targeted support.

Additional Opportunities

Live Virtual Trainings

One-hour sessions for ongoing support.

On-Site Coaching

Tailored observations and feedback to enhance implementation.
