

LAUNCHING FOR BACK TO SCHOOL 2027

RGR Nova™

The Literacy Outcomes System (LitOS™)

Over two-thirds of U.S. students aren't reading proficiently.
More disconnected programs won't fix that.

See what each student needs.
Act on it with precision.
Know it's working.

In most districts, screening, diagnosis, instruction, professional learning, and progress monitoring live in separate programs. RGR Nova brings them together in one system for Grades PK–8. Everything connects to each student's reading skill profile and aligns with core instruction. Teachers know what to teach next and leaders can see where support is needed.

How RGR Nova™ is Different

SKILL-LEVEL PRECISION

Identify specific needs, target instruction, track mastery, and report progress at the skill level.

ASSESSMENT TO INSTRUCTION

Align what assessment reveals to grouping, instructional decisions, and what to teach next.

TEACHER EXPERTISE

Embed professional learning and instructional guidance where educators need it: in the work.

MULTIMODAL COHERENCE

Connect teacher-led lessons, hands-on learning, and practice around the same targeted skills.

DISTRICT CAPACITY BUILDING

Partner to strengthen implementation, educator capability, and sustainable impact across schools.

PAY FOR OUTCOMES

Offer approved contracting options that align a portion of payment with agreed, verified outcomes.

Together: more precise intervention, stronger educators, and district-wide capacity for growth.

Source: 2024 NAEP Reading (NCES). Nationally, 31% of grade 4 and 30% of grade 8 students scored at or above NAEP Proficient.

WHY DISTRICTS CAN TRUST IT

Built on evidence. Backed by a commitment.

Validated design

RGR's foundational skills programs show ESSA Level II evidence. Nova's research-based design meets ESSA Level IV, with further studies planned.

Independently studied

Harvard CEPR is evaluating Indiana DOE's outcomes based contracts with RGR and two other providers.

Trusted partners

Nova uses Lexile® measures from MetaMetrics® to track reading growth, and the Learning Commons Knowledge Graph to map how skills build.

A partner committed to results

Outcomes based contracts are available, tying a portion of fees to independently verified Lexile® growth. Prefer traditional pricing? Nova is still implemented around shared goals, progress measures, and student outcomes.

Built on more than 20 years of RGR literacy instruction

2,000+

districts served by RGR in all 50 states

3.5M+

students served by RGR

RGR programs rated Promising by Evidence for ESSA

RGR K-2 foundational skills programs, all green
