

See the Full Picture of Student Performance

Export the data you need to monitor progress, analyze trends, and support literacy decisions

The Admin Data Export Tool gives school and district leaders direct access to the student performance data behind Really Great Reading. Create configurable reports, from high-level summaries to skill-level detail, to track progress, analyze trends, and integrate RGR data with other systems.

Customizable by date, school, grade, class, student, or program, it provides visibility into trends, simplifies archiving, and supports informed decisions and clear communication of outcomes.

Total Clarity Across Your Data

Flexible reporting options offer control over district- and school-wide reading performance data reporting:

- Composite Score Report
- Assignment Score Report
- Detailed Skills Report
- Detailed Data Report

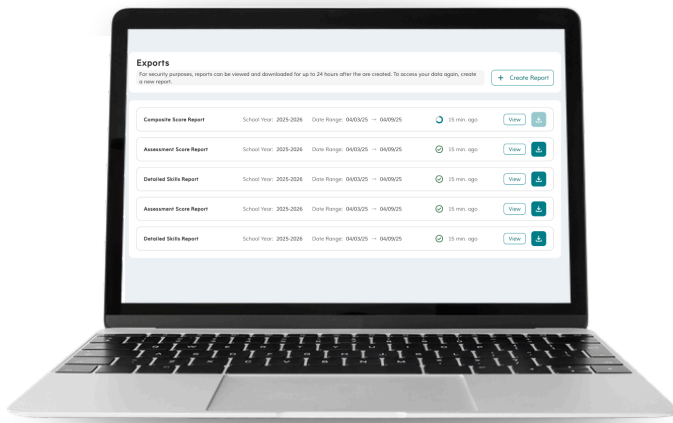

Bring RGR data into your MTSS ecosystem

Export granular performance data to your MTSS platform or district dashboard to analyze trends, plan literacy supports, and make targeted intervention decisions.

Insights at a glance

School and district leaders need complete visibility over their student data to drive impactful literacy initiatives. The Admin Data Export Tool enables you to analyze, archive, and act on performance insights, without relying on manual exports or support tickets.

-  Access both summary and granular-level data
-  Combine RGR data with external tools for deep analysis
-  Easily retrieve prior school year data
-  Empower leadership decisions with complete, exportable data

Use the Admin Data Export Tool to

- ✓ Identify literacy trends and gaps across your school or district
- ✓ Integrate insights with existing dashboards to monitor initiatives more effectively
- ✓ Make data-driven decisions to guide instructional priorities
- ✓ Track progress over time
- ✓ Simplify reporting and archiving, freeing time for strategic planning
