

# Blast Foundations Classroom Setup Options

There are a few options for schools that are interested in Blast Classroom Setups. Each option includes the same number of Teacher Guides, Blast Online Subscriptions, and Student Workbooks; the manipulatives are where the flexibility comes into play. View the options below.

## Each option includes:

Teacher Guides 1 set

Blast Foundations Online  
1 login/1 year subscription

Student Workbooks 20 sets

## Choose your manipulatives:

### Boxed Blast Kit

10 kits

The Blast Kit is a wonderful part of Blast instruction. Students love using the magnetic color and letter tiles to build words. These engaging multi-sensory tools are powerful way to learn and practice the concepts taught in the lessons. SyllaBoards are used to help students read and spell multisyllabic words.

### Blast eLearning Platform

25 x annual subscriptions

The e-Learning Platform is a new online service that can be used as a virtual alternative to Blast Kits. In the e-Learning Platform, students work in a virtual environment to solidify the phonics knowledge that they are learning in the lessons. Students build words with virtual color tiles and letter tiles, and divide multisyllabic words into decodable chunks.

#### Advantages of the e-Learning Platform:

- It invisibly measures student performance and reports the data in an easy to use format
- It offers extension lessons (called "Plus Lessons") for independent student practice
- Each student has their own "kit"
- Allows students to use Chromebooks or tablets (Android or iPads) to manipulate virtual letter tiles.
